The CallMe Card

Your Own Personal 800 number is ready for you!

1. Simply dial 1-800-364-6504, enter your pin, and follow the voice prompts
2. That's it! You're now ready to give your own Toll Free (800) Number and Extension to your family, friends and associates
3. You can recharge your CallMe card three ways: Purchase another CallMe card and add the balance, call customer service; or visit www.thecalimecard.com

Your CallMe card can be used with any phone including cellular. And because it's prepaid you will never get a bill. And you can change the number that you receive calls at as often as you like by simply using the toll free access number.

Rates, fees, taxes and surcharges are subject to change without notice except where prohibited by law. Consult customer service or applicable tariff for current rates, taxes, fees and surcharges. No connection fees. Directory assistance is \$1.00 per call. Payphones are 49¢ per call. Government/carrier imposed taxes, fees and surcharges applies to each call except where prohibited by law. International cellular calls billed at higher rates. Not responsible for lost, stolen or misused cards. Except where prohibited by law, no refunds and no returns. Expires 180 days after last use.

To setup your 800 number or to make a long distance call, dial the number below, enter your PIN and follow the prompts:

1-800-364-6504

PIN: 811 0121 425

Your new 800 number and extension to receive calls is:

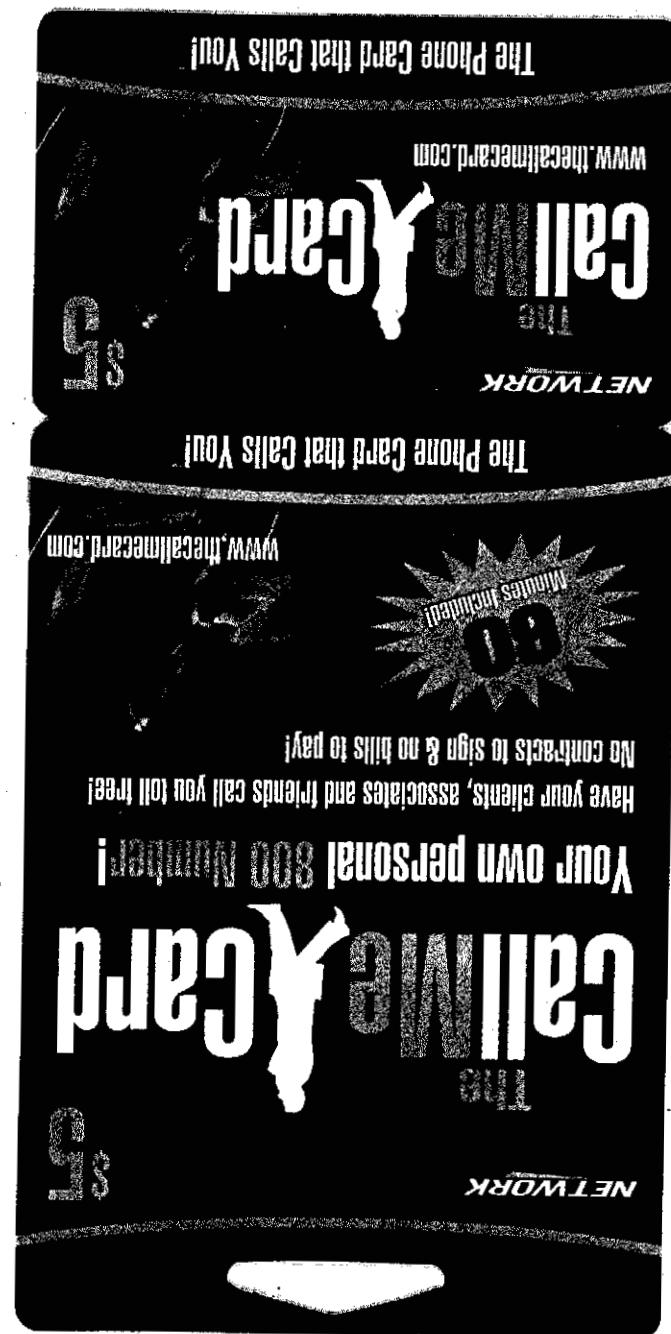

1-800-364-6506

EXTENSION: 801072

For customer service, call: 1-866-847-1670 • For distribution, call: 1-800-364-3992

The Safe Way to Connect

Product Overview

MyPrivateLine is a personal toll-free number that provides privacy and safety by allowing consumers to receive calls wherever they choose without giving out their real phone numbers. There are times when a person wants to be contacted over the phone such as when placing an ad, ordering something online, or meeting someone new – in all these cases MyPrivateLine keeps the user's personal information private and safe.

The Safe Way to Connect

New online phone directories provide a way to take a phone number and use it to look up a person's name, address, and other personal information – sometimes even their social security number. And the newest online directories include cell phone numbers, not just land lines! MyPrivateLine helps individuals protect their privacy and personal safety in the digital age.

How It Works

MyPrivateLine is an innovative new revenue-generating service and value-added up-sell that you can provide to your customers. Using either a live call-center or a simple interface that can be integrated into your existing web site, your customer has the option to purchase a MyPrivateLine phone number. MyPrivateLine technology then generates a toll-free number & extension, which you provide to your customer. Incoming calls are seamlessly forwarded to any phone number the customer selects – home or cell phone, even the office. MyPrivateLine's automated accounting system then calculates your commissions and provides you with detailed sales reports.

Features & Benefits

- Generate profit & ongoing revenue
- No capital investment – MyPrivateLine is simple to implement, manage & bill
- Offer an attractive up-sell option to your customers
- Anonymous calling underscores your commitment to security, safety & privacy for your customers
- Service works using any phone, including cellular
- No change to customer's current phone service
- Prepaid – No separate billing
- Nationwide toll-free access is included with the service
- Incoming call alert – User receives a prompt alerting them to an incoming MyPrivateLine call and has the option to accept or reject
- Customers can quickly and easily change the number their calls are forwarded to as often as they want
- Customers can "turn off" their MyPrivateLine number anytime they choose – no more unwanted phone calls
- Optional voicemail allows customers to take calls when they choose, and to screen calls from incoming callers before actually talking with them
- Rechargeable via phone or online

"Consumers are risking their personal safety and placing themselves at extreme danger of identity theft, harassment, or worse by revealing their home phone number – whether in advertisements and online postings, or to people they meet in chat rooms, on the bus, in bars, or wherever. MyPrivateLine is the only phone number you need to keep your personal information private and yourself and your family safe."

ClassAdd Service

ClassAdd Service allows classified ad customers to keep their personal & private numbers secure when selling an item. ClassAdd Service increases your classified ad profits and generates residual revenue for your publication. ClassAdd provides a personal toll-free number and extension for use in the ad. When potential buyers call, they are automatically forwarded to any number the advertiser desires, including home, office or cell phone.

Security First

ClassAdd Service is a toll-free number that offers classified customers a private and secure phone number to use within a classified ad. ClassAdd Service seamlessly forwards calls to the seller's office, cell, home or anywhere they would like to be reached, even internationally!

How It Works

ClassAdd technology generates a toll-free number and extension, which you provide to your customer. When a buyer calls the toll-free number and enters the extension that appears in the ad, the call rings to whatever number your customer has designated – their office, home, or cell phone.

Corporate advertising customers who use ClassAdd Business service receive regular reports with detailed data about incoming calls.

Features & Benefits

- **Increase Ad Revenue** – Generate profit and residual revenue with **no capital investment**. Provide a value-added service giving privacy and security to your classified ad customer. ClassAdd is simple to implement, manage and bill.
- **Increase Your Product Offering** – Offer a feature-rich, up-sell option that provides important and attractive benefits to your classified customers, including privacy, anonymity and toll-free calling.
- **100% Privacy** – Prevents identity theft, which has become a major concern for consumers today. The assigned phone number is independent and untraceable, so the seller's real phone number remains private and protected from the public.
- **Toll-Free Service** – Research shows that buyers will call toll-free numbers first. By including a toll-free number in the ad, the customer is assured greater response and expanded geographic reach. Available with local phone numbers in order to give the seller a local presence.
- **Keeps The Sales Process Separate** – A totally separate phone number enables the seller to keep the classified sales process separate from their regular phone and prevents the annoyance of calls at inappropriate times. ClassAdd Service can also be cancelled on demand, stopping all calls once the sale is complete.

"Theft of personal information has become a major concern for many individuals. ClassAdd Service is a highly affordable, easy to setup tool for connecting buyers with sellers, while still maintaining confidentiality of the advertiser's private phone number."

ClassAdd Business

ClassAdd Business Service will provide your business/retail advertisers with call detail reporting functionality enabling them to quantify and track the response of their ad. ClassAdd increases your advertising profits and generates a residual revenue channel without the initial capital investment required by other reporting firms.

How It Works

ClassAdd Business technology generates a toll-free number and extension, which you provide to your customer. When a buyer calls the toll-free number and enters the extension that appears in the ad, the call rings to whatever number your customer has designated – their office, home, or cell phone. Business advertising customers who use ClassAdd Business service receive call detail and call tracking information about incoming calls.

Features & Benefits

- **Increase Ad Revenue** – Generate profit and residual revenue with **no capital investment**. Provide a value-added service with detailed call reports to your business advertiser. ClassAdd Business is simple to implement, customize, manage and bill.
- **Increase Your Product Offering** – Offer a feature-rich, up-sell option that provides important and attractive benefits to your business/retail class classified customers.
- **Increases Response** – Research shows that buyers will call toll-free numbers first. By including a toll-free number in the ad, the advertiser is assured greater response and expanded geographic reach.
- **Tracks & Quantifies Data** – ClassAdd Business can help your advertiser analyze the results of their campaign, allowing them to reallocate marketing dollars and market smarter based on ad performance.
- **Captures More Leads, More Sales & More Profit** – Your advertiser receives data on every call they receive, even if the call rang busy or no answer. ClassAdd Business captures every caller's phone number and the sales staff can follow up on leads and close the sale.

ClassAdd Personals

ClassAdd Personals allow users of personal ads to be able to give potential partners an anonymous, confidential phone number. The advertiser designates the forwarding number (can be home, office or cell phone), which remains confidential to the calling party. The safety, security & privacy of the receiving party are always 100% protected.

ClassAdd Personals is a stand-alone dating solution for newspaper publishers. The personal phone number + extension provides anonymity and safety all at once to your advertisers. These are the key ingredients that singles are looking for in dating services today. ClassAdd Personals also provides your advertiser with a private and secure voicemail to use to receive responses to their ad.

How It Works

Newspaper classified salespeople assign the personal number plus extension at the point of sale for use in the advertising copy. The pricing for the phone number plus extension can be built into the overall price of ad placement creating an all-in-one solution.

Newspapers can implement ClassAdd Personals as simply a classified personals category heading or can be expanded into a newspaper branded personals section. The safety and anonymity features of ClassAdd Personals makes it a complete turnkey solution as a stand-alone newspaper advertising section.

For one low price, ClassAdd Personals provides your advertiser a complete advertising package for their personal ad, including the print ad and the anonymous phone number with private and secure voicemail to use for responses.

The CallMe Card

The CallMe Card is a revolutionary new telecommunications product, recently featured on national television. The CallMe Card is the **ONLY** prepaid solution that combines **Personal Toll-Free Service & Call Forwarding** with low cost domestic & international Long Distance service on a single account. Direct Sales Associates use the CallMe Card's unique new services to enhance their professional image and to protect their identity.

Network Marketing companies use The CallMe Card service to provide a uniform, branded 800 toll free service nationwide. The CallMe Card gives independent distributors the prestige of their own toll free number; enabling them to keep their business and personal communications separate!

Advantages For Associates:

Privacy & Safety – Identity theft & personal safety are major concerns today. Reverse phone lookups are readily available on the Internet, providing personal information such as home address and more by simply entering a phone number in a search engine. The CallMe Card allows you to keep your business life separate from your personal life.

Prestigious Image – Toll free numbers can improve a small business's image and convey the impression of a larger, well-established business.

Sales Convenience – Never miss an important call again! Incoming calls can be answered anywhere in the world. Direct calls to ring to a home office, cell phone, pager or even a fax machine!

Business Tool – View call details in real-time. This feature is beneficial for tracking sales efforts, advertising campaigns and business telephone expenses.

Advantages For Company:

Private Branding – Private labeling is available with company logo, tagline, custom prompts & promo announcements

Incremental Revenue – Delivers revenue to network marketing organizations while making their distributors more effective. Toll free numbers provide a local presence anywhere in the U.S. encouraging customers to call, which results in higher sales.

The CallMe Card Features:

Instant Activation: Purchase the CallMe Card online and your service is activated immediately. Account information, PIN and calling instructions will be delivered instantly by email (valid email address is required). Account information will also be made available online via your secure Account Order History page

Call Forwarding: Control where you receive your calls. The CallMe Card seamlessly forwards incoming calls to ring to your home, work or cell phone number...wherever you want to be reached – even to international numbers! Change your forwarding number as often as you wish either online or by using the voice prompts on your touchtone telephone.

Long Distance: Your CallMe Card account works just like any other prepaid phone card. Reliable domestic and international long distance service is included with rates as low as 5¢ per minute (domestic U.S.).

Real-time Web Account Management: With just a few clicks of your mouse, you can change your forwarding number, view call history, view order history, or recharge your account – you can self-manage your CallMe Card account via our secure web interface.

Online Call Detail Reporting: See Call Detail online and in real-time! Search by date range or include all calls. The CallMe Card provides the phone number of all callers, date & time of call, call duration, and the \$ amount of call. This feature is especially beneficial for business users to track expenses.

Rechargeable: The CallMe Card can be recharged using a major credit card at anytime online via our secure web interface or by calling Customer Service.

"Independent reps and home-based business people are risking their personal safety and placing themselves at extreme danger of identity theft or worse by revealing their home or cell phone number to the public. The CallMe Card is an essential tool for the 21st century sales rep or agent to keep your business life separate from your home life, keeping your personal information private and your family safe."
